

## OBD Scanner Walk Around

**What it does:** Diagnoses any mechanical problem(s) on the vehicle so you can create an accurate appraisal.

1. Before you begin, open the Accu-Trade app. Download and allow the device permissions.
2. Associate your OBD Scanner with the VinTel© Module ([full directions here](#)).
3. Open the Accu-Trade Appraisal Application. Scan the VIN Number on the vehicle with your mobile device.
4. OBD Scanner Steps
  - a. Start the vehicle.
  - b. Insert OBD Scanner in the OBD port. This is typically located below the steering wheel column. The OBD Scanner will emit a flashing red light as it reads the vehicle's mechanical issues. This process can take up to 20-40 seconds to complete, depending on the complexity of the VIN.
  - c. Once the light turns green, the scan is complete.
5. The app will connect to the module and send the diagnostic information in the cloud. From there, you will be able to access the Diagnostic Status Report (DSR).
6. Within seconds, you can access VinTel© within the Accu-Trade appraisal. Once available, you should be able to click on the green or red VinTel© icon within the application (  or ). Green notates that the vehicle has little to no issues, and red notates major mechanical issues.
